👤 ABOUT ME

My strength and passion is to understand, optimize and design IT solutions and processes. Whether the task is to implement, support or design new prototypes and solutions, for the last 5+ years I have worked professionally with the branches of IT in connection with my education from the IT University of Copenhagen. In my freetime i dabble with selfhosting, Linux and all things open-source.

📁 EXPERIENCE

UX Consultant, Racing Kids · Freelance 2022 -

- Consulting and preparation of a new workflow for product import as well as general process optimization primarily in shopify.

UX/IT Consultant, Hjorths Badehotel · Freelance 2018 - 2022

Webmaster, Restaurant Rusk · Freelance 2014 - 2018

Store employee, Creative Space APS 2014 - 2015

🎓 EDUCATION

MSc · Digital Design and Interactive technologies, IT University of Copenhagen 2021

The master's program provides a broad understanding of digital design processes from the initial studies of the design domain to testing and implementation. In-depth knowledge of data visualization, context and user analysis is provided, as well as a foundation for understanding of the role digital designs and services play in our society and culture today and in the future.

BSc · Global Business Informatics, IT University of Copenhagen 2018

Global Business Informatics is an interdisciplinary study where you learn to see the possibilities of digital technologies and how they are used in organizational and societal settings. With a bachelor's degree in Global Business Informatics, you are able to work with sustainable development in private companies, public institutions and NGOs.

Student, Ørestad Gymnasium 2014
